

# Salix Resource Management Ltd.

## EMPLOYMENT OPPORTUNITY

### ENVIRONMENTAL CONSULTANT

**Location:** Sundre, AB

Applicants should have a good understanding of soil science, reclamation and farming practices in western Canada. Basic understanding of the oilfield is a definite asset. Valid Class 5 or equivalent Alberta Drivers License required.

#### **Required Qualifications:**

- Diploma, Bachelors or Masters Degree with emphasis on soil science.
- Ability to identify major western Canadian crop species and native grassland species
- Good oral and written communication skills
- Good understanding of western Canadian agriculture and oilfield practices.

#### **Duties:**

- Assist in assessing reclamation projects according to Alberta Environment reclamation criteria.
- Describing and sampling soils
- Conducting vegetation assessments on native rangeland sites and identifying ecological site types
- Conducting vegetation assessments on cropland
- Developing reclamation and remediation plans for abandoned wellsites and supervising equipment on sites.
- Developing sampling plans and carrying out investigations of potentially contaminated sites while supervising drill trucks.
- Writing professional reports outlining findings of field investigations.
- Conducting file reviews for Environmental background

This position requires a significant amount of travel throughout Alberta, with extended periods of field work. Ability to provide a 4x4 truck for work is desirable, but is not essential. Compensation is commensurate with qualifications and experience.
